

T03 — Per-round trajectory · oracle re-measurement (2026-05-05)

Round 6 R-free 0.207 beats round 7 R-free 0.212 · NCS-torsion claim doesn't reproduce at oracle scaling

Round 6 → Round 7

R-free **0.207** → **0.212**

$\Delta = +0.005$ (worse)

Agent claims round-7 NCS torsion restraints reduced the gap.

Oracle scaling shows the opposite: a small but reproducible regression.
